

Bienfang® puts a new complexion on famous MightyCore® Foam Boards to create MightyPrint™ Expressions for the digital flatbed printer market

MightyPrint™ expands design, printing and fabricating production capabilities.

No other board available to the graphics display market today has the rigidity, warp-resistance, lightweight strength and endurance that sets MightyPrint Expressions apart.

The technology is exclusive to Bienfang®

The unique properties of MightyPrint enables businesses to expand production capabilities by eliminating the time-consuming steps of either applying a liquid laminate to the printed board, or printing on textured paper and then mounting that paper to a board.

Looking beyond its unique surface options – its rigid, 1/4” foam core and 48” x 96” sheet size make MightyPrint structurally superior, and ideal for the big jobs .

Rave Reviews are Coming in for new Bienfang® MightyPrint™ Foam Boards:

Here’s what Ken Lau of AGFA has to say ...

“Print evaluations were conducted on the substrate Bienfang Mighty Print™ using AGFA Anapurnas. The results of these trials were phenomenal.

Due to its polished glossy surface, and flatness and rigidness known for Mighty boards, I believe that MightyPrint is superior to almost all other foam board type substrates, and is most compatible for AGFA UV inkjet.”
